

## 1. What is EzRestore?

### 1.1 Overview

Ever watch the movie "Back to the future"? Well, though you cannot go back to future in real life, AOpen allows you to go back to yesterday before your PC was infected by a virus or crashed by installing a device or application! AOpen EzRestore Motherboard implements Time Machine kernel within BIOS and a Pre-OS utility called Pro Magic to realize your fantasy! All you have to do is to just save a single time point of your hard disk image, and then you may go back to this certain time point any time you want. It is not a mirror operation, so it's not necessary to have big hard disk space for this job. Only 100MB<sup>1</sup> is enough for hard disk of any size. Yes! No doubt about it! A 80GB hard disk can be protected by only 100MB<sup>1</sup>, and it is hidden.

Who are best suited for this AOpen EzRestore function:

- If you have to install/test device and application regularly.
- If you would like to have 100% Anti-Virus protection.
- If you were the school IT manager, you could change your system back to original setting easily, after your students had changed them.
- If you were a company IT manager, you would like to recover the crashed system as soon as possible, with least effort.
- Or, if you were the one running Internet Cafe, once setting had been messed up by customer, you could just change your system back to original setting easily.

<sup>1</sup>The required space will be variable depend on the different OS.

Serial Number: 15654000000001N603UY

## 1.2 Features of AOpen EzRestore :

- EzRestore supports all Windows systems (95/98/ME/NT/2000/XP), and allows you to restore the entire windows system no matter data was inappropriate deleted, system crash down or even the fully destruction of your operating system.
- Fully implements 32bits kernel to accelerate the data restore speed.
- User-friendly Interface, easier to use.
- Defaulted double password (user password and manager password) protection to ensure safer security, which could truly prevent others from using your computer and the leaking of your data.
- Prevents CMOS from unauthorized modification, access and the wreckage of low-level programmable application.
- Software watchdog: It provides a protection mode, which allows you to test any kinds of software freely. You may just reboot the computer to restore back to the previous status if you find the software is inappropriate, EzRestore will remove those testing software completely from your computer.
- Allow you to set booting sequence and be able to prevent floppy boot-up from unauthorized person.
- Allow you to save and restore anytime.
- Supports multi restore points, Multi-booting function. (Upgrade Option)
- Free naming of the restore points, unlimited dynamic restore points. (Upgrade Option)
- Scheduled Save, Scheduled Multi Points Save. (Upgrade Option)

## 2. How to install EzRestore?

### 2.1 BIOS Setting

EzRestore/ProMagic is a BIOS kernel developed by AOpen and WASAY to achieve perfect compatibility with your PC system. Before installing ProMagic6.0, it is a MUST to enable the EzRestore function in the BIOS setting.

#### Note :

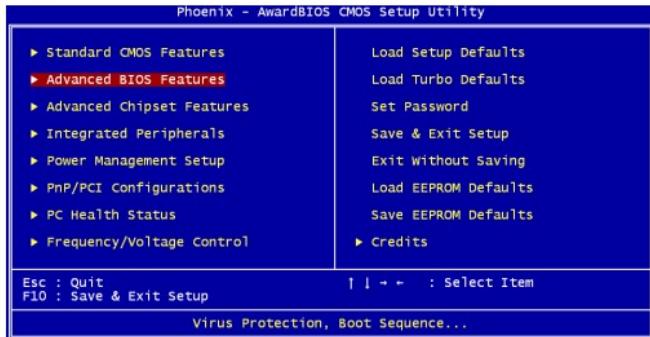

1. It's highly recommended you have second partition as your data disk to store your valuable data. When you restore your boot disk, those valuable data will not be over-write.
2. Remove other multi-boot program/boot manager program before install AOpen EzRestore, if any.

Not long after activating the power, you will see a line of message saying "Press DEL to enter SETUP" at the bottom of the screen. Please press **Delete** button on your keyboard:

## Easy Installation Guide

Now, you will see this blue screen, you move the cursor by using direction keys. Move the cursor to the option item "Advanced BIOS Features." Press [Enter] to get in for further setting.

Make sure EzRestore kernel is enabled.

Finally, move the cursor to "Save & Exit Setup" and press **Enter** to save the parameters and exit BIOS setup.

**Note :**

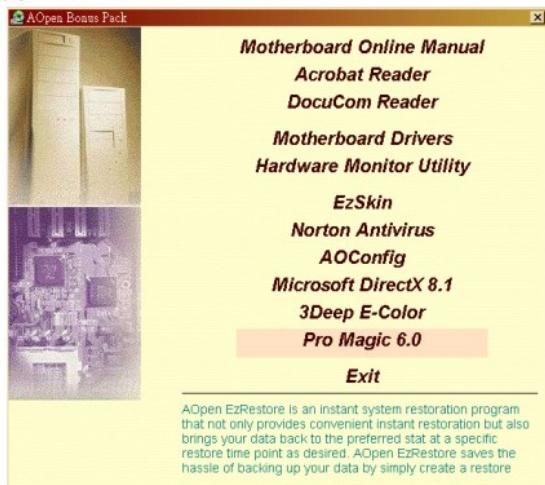

*AOpen EzRestore will detect your motherboard before installation. The software can only be installed with AOpen motherboard. The elder BIOS version could cause the failure of EzRestore installation. If you want to upgrade your BIOS to the latest version, please go directly to AOpen website. Thank you.*

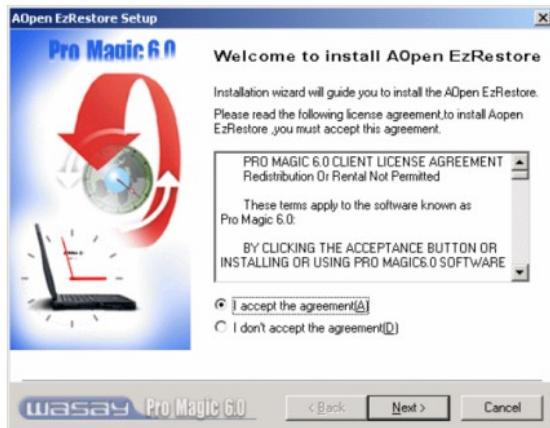

## Easy Installation Guide

### 2.2 Installing ProMagic 6.0 under Windows

After insert Bonus CD into CD-ROM drive, Autorun will pop up automatically. Please click on [Pro Magic 6.0] in Autorun menu to continue.

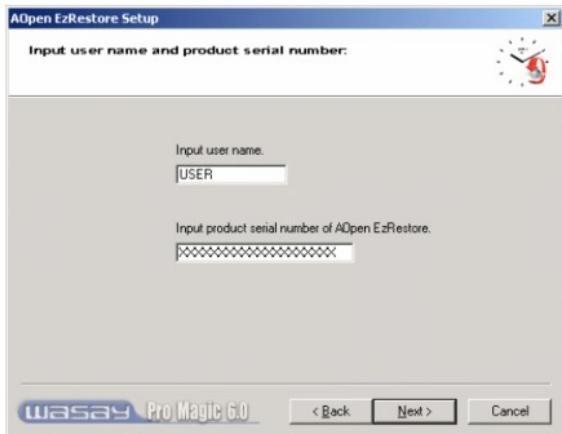

Please select [I accept the agreement]. Then choose [Next>] to continue.

## AOpen EzRestore Easy Installation Guide

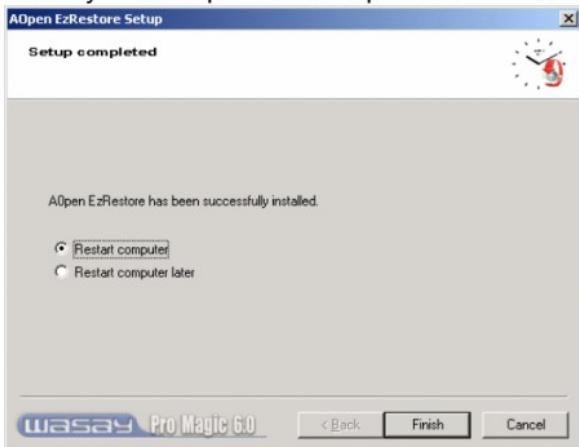

The installation will ask you to enter a set of serial number. Please key in the serial number on serial number sticker correctly. After keying, please click on [Next>] to continue.

Then, please choose [500MB] and click on [Next>].

The installation is complete! The system will remind you to reboot! After rebooting, the system will start EzRestore program immediately. Let's experience the powerful EzRestore !
